## New and Rebuilt Rotors

USNR offers the complete line of rotors for Cambio® type debarkers in the following sizes: 14", 18", 24/25", 26" and 30". These heavy duty rotors offer increased flexibility, designed to accommodate the various types of tool tensioning systems including Hydraulic, Spider and Air Bag systems.

- ▶ Whether it is a new or rebuilt rotor, every stage of preparation, machining, assembly and testing is done at our facilities, by our technicians using the original technology and specifications. This ensures the highest quality of workmanship and maintains original manufacturing standards.
- ▶ We offer repair and exchange options to provide you with more flexibility and faster turn around times.
- ▶ All rotor work includes the latest improvements and advancements that have been made over the years, such as adding grease points to better lubricate the internal bearing of the rotor and the tool holders.
- ▶ All new and rebuilt rotors come with a twelve (12) month warranty (based on a one (1) day work shift) that covers material defects and workmanship done at our facilities. The warranty takes effect at the start-up of the rotor.

**Option 1)** We will ship you a rebuilt rotor from our inventory and take your old one in exchange.

**Option 2)** We will evaluate, repair and return your rotor to you within one to three weeks depending on the extent of work needed.
