DEBARKING SYSTEM

## Tenax Debarking System

USNR's engineers went out and listened to mill operators before setting out to design the next generation of debarker tool systems. Based on this input, they then began the design process, starting with a blank sheet of paper to make sure that the final product would not be compromised by previous design decisions.

The result is USNR's Tenax Debarking System, providing a smart alternative for high-performance, reliable debarking. Designed to retrofit any Cambio-style debarker, the Tenax tool system is also standard equipment on new USNR debarkers. The innovative design has been fully developed and tested, yielding a debarking tool system that runs rings around the competition.

**Outstanding Performance**  
**Rugged Durability**  
**Total Value**

## Tenax Debarking System Features & Benefits

Robust Tool Holder

Machined Mating Surfaces

Grade 8 Anti-vibration Bolts

Millwide. Worldwide.
